

How many bags of soil should I buy?

Type of Container	Size	Dry Quarts	How Many Bags? (1 cu ft)
Pot	10"	7	1/4 bag
	12"	11	1/3 bag
	14"	16	1/2 bag
	24"	22	2/3 bag
Basket	10"	6	1/4 bag
	12"	8	1/4 bag
Raised Bed	4' x 1.5' x 1' (6 cu ft)	162	6 bags
	4' x 4' x 1' (16 cu ft)	432	16 bags
	4' x 2' x 2.5' (20 cu ft)	540	20 bags

Which soil is best for my garden goal?

Choosing the correct type of soil will determine the success of your plant! Check out the following to decide which is best for your garden goals.

Espoma Organic Potting Mix

- Use for planting all indoor and outdoor container plants.
- Perfect for vegetable planting, annual containers, and houseplants.
- Fortified with earthworm castings and mycorrhizae (a beneficial fungus which grows in association with the roots of a plant in a symbiotic relationship).

Farfard Ultra Potting Mix

- For planting annual or perennial bedding plants in hanging baskets, window boxes, and containers.
- Great for houseplants.
- Has extended feed fertilizer to help with the root development and plant growth.

Espoma Raised Bed Soil

- Use for all raised bed plantings.
- Can be used to fill in new raised beds, or to improve the existing soil structure.
- Has mycorrhizae (a beneficial fungus which grows in association with the roots of a plant in a symbiotic relationship).

Farfard Ultra Container Mix with Extended Feed

- For planting annuals or perennials.
- Good for bedding plants in hanging baskets, window boxes, and containers.
- Has water holding crystals to keep the soil moist over a longer period of time.
- Extended feed fertilizer to help root development and plant growth.

Container Gardening Tips

Container plants require more frequent watering than those growing directly in the garden. Water whenever the soil surface feels dry to the touch (During hot, sunny periods you'll probably have to irrigate every day) This is especially important for hanging baskets that dry out faster because they are buffeted by the wind.

For a gorgeous layered look, you may want to include a tall, showy plant (thriller), a bushy medium-size plant (filler), and a trailing blooming plant (spiller) in your containers.

To keep flowers and vegetables in top form all summer, you'll need to fertilize them. Some potting soils have slow-release fertilizer already mixed in, but it's still a good idea to add some liquid fertilizer every time you water. Flowers and vegetables are heavy feeders and will thrive with an extra dose of plant food.
