

## How many bags of soil should I buy?

Size of Garden (at 1" depth )	How Many Bags? (1 cu ft)
4' x 4' (16 sq ft)	1 bag
4' x 8' (32 sq ft)	2 bags
8' x 6' (48 sq ft)	3 bags
10' x 4' (40 sq ft)	3 bags
10' x 10' (100 sq ft)	6 bags
16' x 10' (160 sq ft)	9 bags
16' x 16' (256 sq ft)	15 bags
20' x 20' (400 sq ft)	23 bags

## Which soil is best for my garden goal?

Choosing the correct type of soil will determine the success of your garden! Check out the following to decide which is best for your garden goals.

### Espoma Organic Lawn Soil

- For new and established lawns, seedlings, and sod.
- Use prior to seeding or installing new sod.
- Perfect for lawn repair projects.

### Espoma Organic Vegetable and Flower Soil

- For vegetables, perennials, and annuals.
- Mix with existing soil when planting.

### Farfard Ultra Planting Mix

- For use in annual, perennial, and bedding plantings, trees, and shrubs.
- Mix with existing soil to provide additional organic matter and fresh soil.

### Farfard Premium Top Soil

- For turf and landscape projects, trees, and shrubs.
- Features an organic wetting agent to help soil stay evenly moist.

### Farfard Natural and Organic Compost

- For use prior to planting, as well as to top dress planting area.
- Mix with existing soil to get fresh, organic material back into the soil.
- Use in vegetable gardens, perennial beds and annual planting.

### Espoma Bio-Tone

- Promote faster establishment, deeper roots and a superior soil structure.
- Must be added to soil before planting.

### Bonide Root N' Grow

- Fertilizer that stimulates root growth, promoting green and healthy plants.
- Can be used before or after planting.

# In-Ground Gardening Tips

Place your garden in a part of your yard where you'll see it regularly (out of sight, out of mind definitely applies to gardening). That way, you'll be much more likely to spend time in it.

Pay attention to how sunlight plays through your yard before choosing a spot for your garden. Most edible plants, including many vegetables, herbs, and fruits, need at least 6 hours of sun in order to thrive.

Plant your new garden near a water source!

This will make watering convenient. The best way to tell if plants need watering is to push a finger an inch down into the soil (that's about one knuckle deep). If it's dry, it's time to water.

Soil works best in concert with regular boosts of high-quality nutrition for your plants. In other words, amazing soil + top-notch plant food = super garden success!
